

Global Colocation and Data Center Services

Market overview

One of the impacts of the pandemic has been the acceleration of **digital transformation** initiatives and **public cloud** has been a key driver to these efforts.

This new scenario will increase the amount of **infrastructure** required to provision these services, as well as the storage facilities.

With our solutions, we aim to build strategic vendor relationships while providing our associates with an industry leading portfolio of cutting-edge products and services.

Our global colocation is designed to provide the perfect **platform** to continue growing in competitive markets and generating more revenue by selling our colocation and cloud connectivity services as part of their solutions.

Services

From our data centres located in **Miami** (KeyCenter™), **Brasil** (Tamboré), **Spain** (Alcalá) and now **United Kingdom** (London), we are able to provide world class integrated Telecom and IT solutions to companies based in **USA**, Europe, Latin America and worldwide access thanks to our more than 400 partners network.

Our resilient features and world class 24x7x365 global support provide enhanced **security, redundancy and connectivity** that ensure greater performance and improved control for all your mission-critical and data intensive applications.

For all the colocations features and elements, Telefónica Global Solutions provides a world-class environment designed to protect and maximize performance of the IT equipment.

In addition to colocation services, we provide world class integrated managed Telecom and IT solutions such as network connectivity, security, backup and storage, database services, multicloud ecosystems, interconnection services and much more.

Telefónica KeyCenter™

The KeyCenter™ is a key communication hub and data center strategically located in Miami, FL, where the crossroads of many fiber optic cables connect North America, Europe and Latin America. It offers direct connection to our global Tier-1 backbone and cable systems spanning more than 65,000 km around the globe.

The Miami KeyCenter™ has been designed to meet the highest standards of quality and reliability. It has a total area of 175,000 sq ft and is compliant with all certifications to keep your IT infrastructure and data safe.

The best public and private cloud offering: Virtual Data Center, Amazon Web Service, Microsoft Azure, Microsoft O365, Google Cloud Platform, your choice!
