

WORKPLACE OF THE FUTURE

# Enhancing the transformation of workplace

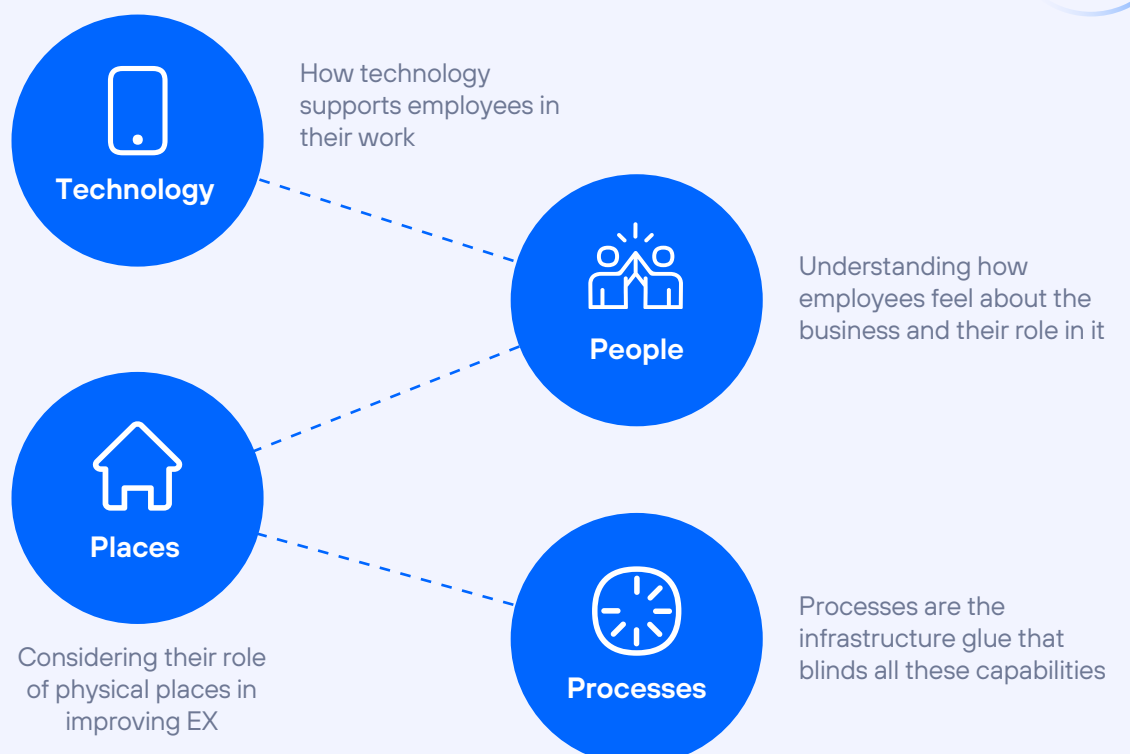

We are your **one-stop-shop** for managed products and services of the **Hybrid Workplace** (*work-from-home + work-from-office*), **in the cloud and guaranteeing your security**

## Market context

New ways of working are opening their own path through all organizations and the transformation opportunity transcend all elements of the tradicional workplace.

Open communcations, security, flexibility and easy integration with your corporation tools as an E2E service, rescues the plug-and-play concept to include it as a basic element in the current relationship between companies and their employees.

# Our mission

is to deliver an exceptional end-user experience by empowering your employees to work securely anywhere, anytime through the design, delivery, adoption and management of devices, desktops and apps.

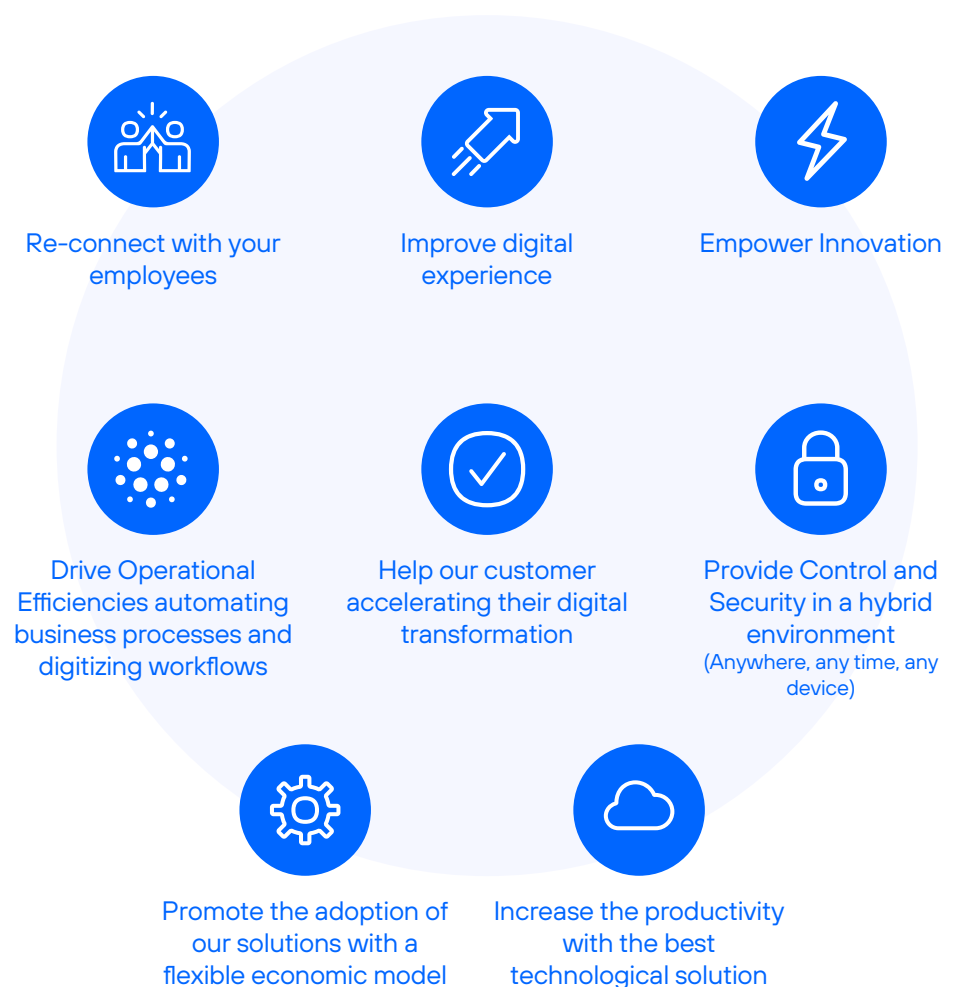

To this end, TGS created the Customer Project Office in response to the growing need within the Telefónica Group to have a team specialised in technological integration projects that would enhance its global footprint, its transversality in terms of solutions and its excellent operations.

## FEATURES

- **Device as a Service:** includes hardware bundling it with a variety of services and software.
