

ADVANCED SATELLITE INTERNET

High speed Internet anywhere in the world

Large-scale broadband, reducing the digital divide, fostering digitalization.

OUR SERVICE

Telefónica Global Solutions delivers innovative Satellite Broadband Internet with LEO and HTS technologies, offering reliable coverage for diverse connectivity needs. Our services connect even remote locations, ensuring high performance through low-latency and high-speed LEO networks.

Ideal for real-time applications, these solutions support video conferencing, cloud computing, and critical business operations, providing seamless, resilient connectivity worldwide. Traffic routing is flexible via our international MPLS network, ensuring dependable service wherever it's needed.

Take advantage of our regional multiservice infrastructure Specialization and experience

We support expansion with backup links, last-mile solutions, and bridging the digital divide. LEO technology ensures **rapid deployment and seamless integration** for extending high-speed internet to underserved areas, driving business continuity and regional development.

Partnering with top satellite providers, including **Starlink**, we can deliver superior connectivity. Our strategic teleports and third-party agreements guarantee extensive coverage across Latin America, Europe, the Middle East, and North Africa.

- **Ad-hoc projects, turnkey solutions**
- **Managed service, OPEX model or generic brand.**
- **Equipment can be purchased or rented.**
- **Installation and maintenance.**
- **Clear and flexible price plans**
 - Pay-per-use, with and without excess or flat fee.
- **Three 24x7 NOCs**
 - Whit support in Spanish, Portuguese and english.
- **The newest addition to the portfolio: Ground-breaking LEO Satellite Technology**

Bringing superior data rates and throughput to Satellite solutions, together with low latency, TGS LEO Satellite services portfolio is designed to meet diverse and demanding requirements

How does Satellite Broadband help?

Global Coverage

Telefónica Global Solutions operates an extensive satellite network in Latin America with key Gateways in Laredo (USA) and Arica (Chile). Through partnerships with high-performance providers like HTS and LEO, including Starlink, we offer cutting-edge connectivity and broad coverage.

Key services

- **Broadband internet** up to 200 Mbps download and 50 Mbps upload.
- **VoIP and video** with traffic management for guaranteed quality.
- **A broad technology portfolio**, including HTS and LEO, ensuring global reach.
- **Last-mile solutions** for 3G/4G/LTE/5G operators.
- **Multi-service infrastructure** across core regions.

Tailored for business

Ideal for mobile operators, wholesale providers, TTO platforms, and content distributors needing scalable, high-performance connectivity. Our LEO solutions ensure fast deployment, enhanced performance, and reliability for business expansion, service enhancements, or disaster recovery scenarios.

How does Satellite Broadband work?
