

## IoT-SMALL CONNECTIVITY

# Connecting devices and businesses wherever they are

Opening a window to innovation and competitiveness

## OUR SERVICE

With our **Small Connectivity Satellite IoT** solution, you can connect your organisation's key devices and assets where other technologies cannot reach. You will be able to remotely manage devices in a variety of cases or bi-directional applications such as monitoring, telemetry, control and transactional traffic.

Our offering adapts to the needs of different industries such as Agriculture, Oil & Gas, Mining, Utilities, Transport & Logistics, TELCO, Banking & Payments, Government, Healthcare, FMCG, OTTs, etc.

## Stay connected to your devices

We put the best satellite technology at your fingertips to ensure constant connectivity.

### REAL-TIME REMOTE MANAGEMENT

M2M/IoT satellite IP connectivity solution for monitoring and control (SCADA) traffic, ensuring a permanent connection to critical devices and assets. The service is based on two types of satellite terminals: BGAN M2M, VSAT and Starlink in L and Ku bands.

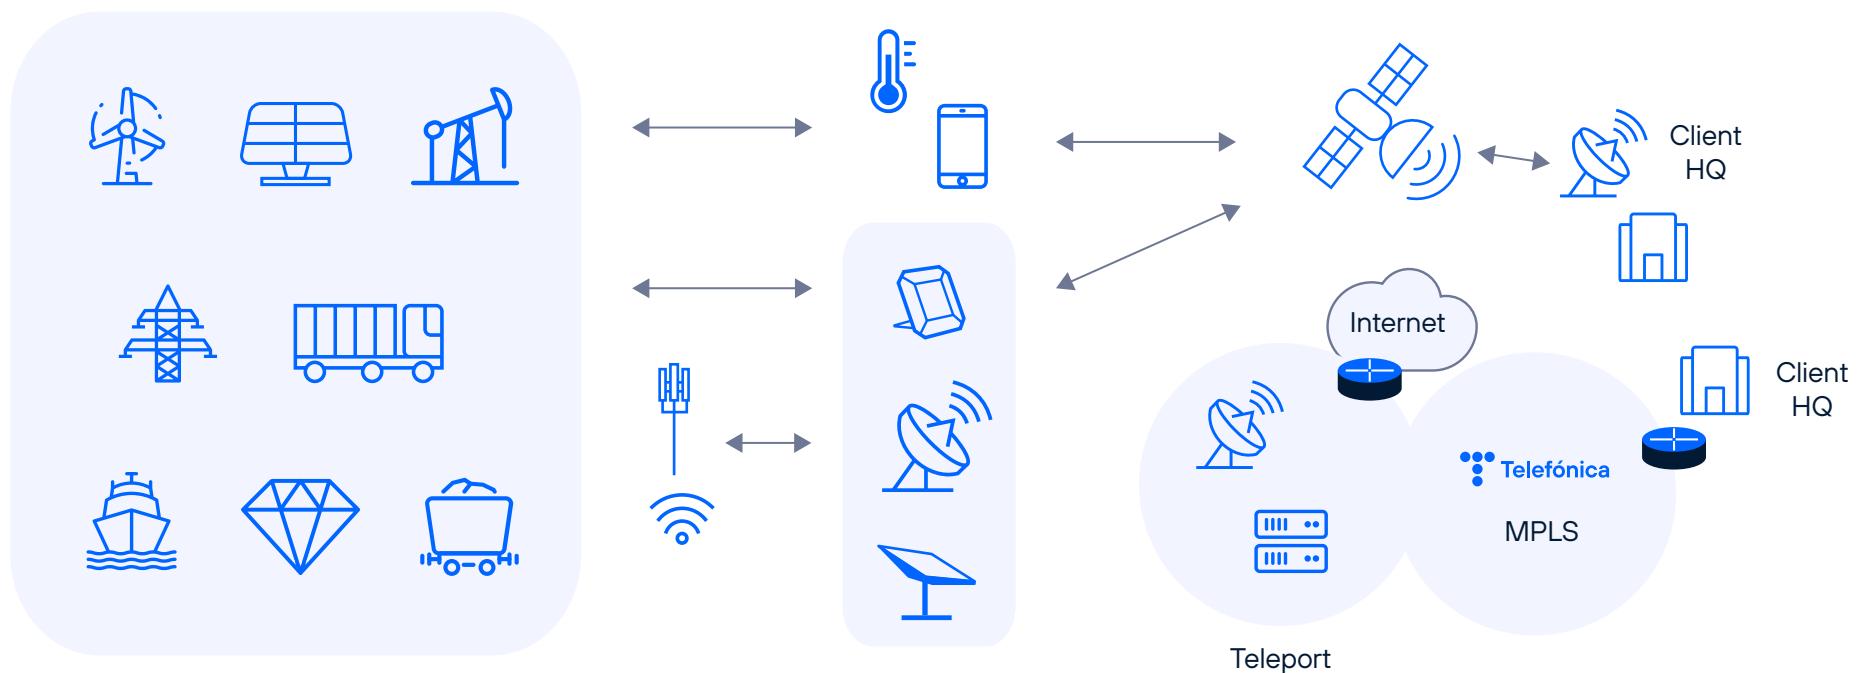

- Terminals can be purchased or leased.
- Speeds from 500kbps.
- **Secure access** via the Internet or private networks, following best practices in authentication and encryption protocols.
- Option to transport traffic using the **TGS MPLS terrestrial network**.
- **Point-to-point, point-to-multipoint**, with the possibility of terrestrial distribution (cellular, Wi-Fi, etc.) and direct-to-device solutions.
- **Web portal for self-management**
- **Clear and flexible tariff plans:**
  - Pay-per-use, with or without franchise.
  - Pool of managed terminals with traffic exemption.
  - Flat rate.

# How can IoT-Small Connectivity help you?

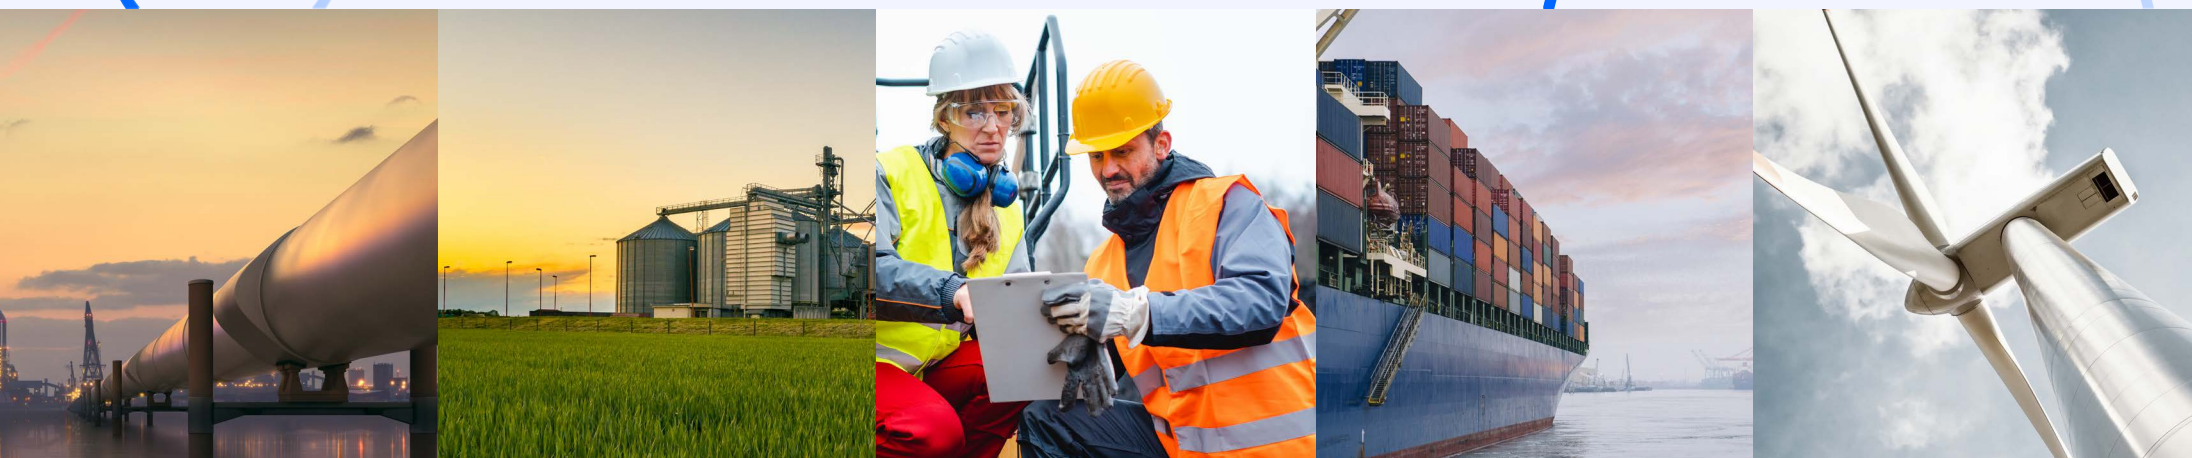

We partner with leading suppliers of equipment, platforms and satellite capacity, enabling us to offer state-of-the-art solutions, the best coverage in the Americas, Europe and North Africa, and reach the rest of the world through third-party agreements.

A flexible service model that adapts to your needs:

- **Ad hoc industry projects**, turnkey, managed service or white label.
- **Professional consulting**, training, installation and maintenance services.
- **Team of specialists** with experience in satellite, cellular, network and IoT services.
- Ongoing exploration of sector applications with **new technologies such as HTS and LEO constellations**.
- **Scalable, flexible, fast installation service with plug & play terminals**, easy to use, portable and lightweight to withstand the most adverse weather conditions.
- **3 specialised NOCs** 24x7, in "follow the sun" mode, with committed SLAs.
- **Support and assistance** in English, Spanish and Portuguese.
- The value generated by the **Telefonica Group** guarantees the highest quality in the most demanding connectivity environments.

## Use Cases

Oil & Gas

Agribusiness

Mining

Logistics and transportation

Energy and utilities
